Examiner

Jinsong Hu

Art Unit

2154

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 July 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-45 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-45 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____. 6) ☐ Other: _____

DETAILED ACTION

1. Claims 1-45 are presented for examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3, 5-6, 16-18, 20-21, 31-33 and 35-36 are rejected under 35 U.S.C. 102(e) as being anticipated by Carre (US 6,282,579).

4. As per claim 1, Carre teaches the invention substantially as claimed including a network management system [col. 1, lines 10-19] comprising:

a gateway [CMISE Gateway, Fig. 3a] which is coupled to one or more managed objects [col. 5, lines 2-23] and which is configured to deliver messages between the managed objects and one or more managers [Fig. 2b; Fig. 3a-3b; col. 3, lines 33-53; col. 5, lines 9-20]; and

a platform-independent interface [i.e., CMISE/IDL] to the gateway, wherein the gateway is configurable to communicate with the managers through the platform-independent interface to deliver the messages [col. 5, lines 25-33 & 60-65].

Wherein the gateway is configurable to deliver the messages for each manager in a format selected by that manager [col. 5, lines 49-59; col. 6, lines 30-35].

5. As per claim 2, Carre teaches that the selected format comprises text [col. 6, lines 30-35].

6. As per claim 3, Carre teaches that the selected format comprises Abstract Syntax Notation One (ASN1) [col. 1, lines 38-42].

7. As per claims 5-6, Carre teaches that the platform-independent interface to the gateway is expressed in an interface definition language, and wherein the interface definition language comprises a language for defining interfaces to managed objects across a plurality of platforms and across a plurality of programming languages, and the interface definition language comprises OMG IDL [col. 4, lines 7-13].

8. As per claims 16-18 and 20-21, since they are method claims of claims 1-3 and 5-6, they are rejected for the same basis as claims 1-3 and 5-6.

Art Unit: 2154

9. As per claims 31-33 and 35-36, since they are program claims of claims 1-3 and 5-6, they are rejected for the same basis as claims 1-3 and 5-6.

10. Claims 1-2, 4-11, 13-17, 19-26, 28-32, 34-41 and 43-45 are rejected under 35 U.S.C. 102(e) as being anticipated by Shank et al. (US 6,445,776 B1).

11. As per claim 1, Shank teaches the invention substantially as claimed including a network management system [col. 1, lines 13-18] comprising:

a gateway [220, 230, Fig. 2] which is coupled to one or more managed objects [i.e., data in different resources] and which is configured to deliver messages between the managed objects and one or more managers [210-216, Fig. 2; col. 4, line 65 – col. 5, line 12; col. 7, line 63 – col. 8, line 9]; and

a platform-independent interface [i.e., media service interface] to the gateway, wherein the gateway is configurable to communicate with the managers through the platform-independent interface to deliver the messages [col. 17, lines 26-37].

Wherein the gateway is configurable to deliver the messages for each manager in a format selected by that manager [col. 5, lines 39-50].

12. As per claim 2, Shank teaches that the selected format comprises text [228, Fig. 2].

Art Unit: 2154

13. As per claim 4, Shank teaches that the messages are communicated with the managers via Internet Inter-Object Protocol (IIOP) [col. 3, line 65 - col. 4, line 1].

14. As per claims 5-6, Shank teaches that the platform-independent interface to the gateway is expressed in an interface definition language, and wherein the interface definition language comprises a language for defining interfaces to managed objects across a plurality of platforms and across a plurality of programming languages, and the interface definition language comprises OMG IDL [col. 4, lines 7-13].

15. As per claims 7 and 8, Shank teaches that the managed objects comprise one or more objects corresponding to a telephone network [210, Fig. 2; col. 7, lines 20-24].

16. As per claims 9 and 10, Shank teaches that the gateway comprises a request gateway which is configured to deliver messages generated by the one or more managers to the one or more managed objects, and wherein the messages comprise requests for the one or more managed objects [col. 2, lines 64-67; col. 7, lines 43-46; col. 7, line 66 – col. 8, line 6].

17. As per claim 11, Shank teaches that the requests comprise a command to set one or more parameters [i.e., tvmlist, offset, etc.] of one of the managed objects [col. 17, lines 53-66].

Art Unit: 2154

18. As per claim 13, Shank teaches that the requests are converted from the interface definition language to a platform-specific format prior to delivery to the managed objects [col. 5, lines 39-50].

19. As per claim 14, Shank teaches that the gateway comprises an event gateway [234, Fig. 2], and the messages comprise events associated with the managed objects [col. 5, lines 5-12].

20. As per claims 15, Carre teaches that the events comprise an alert generated by one of the managed objects [col. 6, lines 59-61].

Claim Rejections - 35 USC § 103

21. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

22. Claims 3, 12, 18, 27, 33 and 42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shank et al. (US 6,445,776 B1) as applied to claim 1-2, 4-11, 13-17, 19-26, 28-32, 34-41 and 43-45 above.

Art Unit: 2154

23. As per claims 3 and 12, Shank teaches the invention substantially as claimed in claim 1. Shank does not specifically teaches that the selected format comprises Abstract Syntax Notation One (ASN1) and the requests are converted from the interface definition language to a Portable Management Interface (PMI) format prior to delivery to the managed objects. However, it would have been obvious to a person of ordinary skill in the art at the time the invention was made that utilizing art well-known specification language [e.g. ASN. 1] and particular interface format [e.g. PMI] in Shank's system for fulfilling the system requirement.

24. As per claims 18 and 27, since they are method claims of claims 3 and 12, they are rejected for the same basis as claims 3 and 27 above.

25. As per claims 33 and 42, since they are program claims of claims 3 and 12, they are rejected for the same basis as claims 3 and 12.

Conclusion

26. Applicant's arguments filed on 7/7/03 for claims 1-45 have been fully considered but they are not deemed to be persuasive.

27. In the remarks, applicant argued in substance that (1) Carre does not teach the gateway is configured to deliver the message for each manager in a format selected by that manager; (2) Carre does not teach that the selected format comprises text.

Art Unit: 2154

(3) Shank does not teach the gateway is configured to deliver the message for each manager in a format selected by that manager; (4) Shank does not teach that the selected format comprises text.

28. Examiner respectfully traverses applicant's remarks:

A. As to point (1), applicant fails to consider the teaching of the Carre for translating each message from one format [i.e., OSI objects] into another format [i.e., CORBA objects] in the communication layer of the gateway, wherein the format can be accessed by each deliver manager [i.e., classic CORBA message; col. 5, lines 49-59]. Thus, Carre does teach the gateway is configured to deliver the message for each manager in a format selected by that manager.

B. As to point (2), applicant fails to consider the teaching of Carre for converting the full-distinguished name [i.e., text] for the message being transferred [col. 6, lines 30-35] form type of the objects reference to ASN.1 type [col. 6, lines 22-26]. Thus, Carre does teach that the selected format comprises text.

Accordingly, Carre is a relevant reference.

C. As to point (3), applicant fails to consider the teaching of the Shank for providing media services which including text-to-speech services, speech recognition services, facsimile services, etc, the format or interface for each of these services are different, they are being selected by that deliver manager [i.e., player, recognizer, etc.; col. 5, lines 39-50; col. 17, lines 26-37]. Thus, Shank does teach the gateway is

Art Unit: 2154

configured to deliver the message for each manager in a format selected by that manager.

D. As to point (2),¹ applicant fails to consider the teaching of Shank for providing text-to-speech services [col. 5, line 40]. Thus, Shank does teach that the selected format comprises text.

Accordingly, Shank is a relevant reference.

29. THIS ACTION IS MADE FINAL. See MPEP §706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

30. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

31. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jinsong Hu whose telephone number is (703) 306 – 5932.

Art Unit: 2154

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai An, can be reached on (703) 305-9678. The fax number for this Group 2100 is (703) 872-9306.

Any inquiry of a general nature or relating to the status of the application should be directed to the Group receptionist at (703) 305-3900.
